

## **NW Alliance for Clean Transportation**

### **Mission:**

To promote a cleaner transportation environment through increased use of Conventional & Renewable Natural Gas (CNG/RNG) in medium- and heavy-duty vehicles throughout Oregon, Washington, and Idaho.

The NW Alliance for Clean Transportation, Cummins Engines, Intermountain Gas, and the Idaho Trucking Association take this opportunity to invite you to a lunchtime conversation regarding the benefits of using Conventional or Renewable Natural Gas (CNG/RNG) as a transportation fuel.

RNG offers trucking companies, including waste and ag haulers, an opportunity to:

- Run heavy at 129,000 pounds without materially compromising range.
- Turn waste into fuel.
- Cut their transportation fuel bill by as much as 90%.
- Decarbonize their fleet and meet sustainability goals.

Over lunch at Intermountain Gas' offices in Boise and Jerome, we'll cover the following topics:

- What is Conventional and Renewable Natural Gas (CNG/RNG)?
- How does natural gas engine technology work?
- How does natural gas fueling work?
- What are financial, operational, and environmental benefits associated with using CNG and RNG as fuel?

These events will take place at Intermountain Gas Company (IGC) headquarters from 11:00 a.m.– 2:00 p.m. On Wednesday, September 28, we'll host this event at IGC's offices in Boise. The address is: 555 S Cole Road, Boise, 83709. On Thursday, September 29, we'll host an identical event at IGC's facilities in Jerome. The address is: 451 Alan Drive, JEROME, 83338.

To register, please use the links provided – below:

For Boise on September 28, [click here](#).

For Jerome on September 29, [click here](#).

Should you have questions, please don't hesitate to reach out to me. You will find my complete contact information – below.
